

ERRATUM

Ranawake AL*, Nakamura C 2011 Cold tolerance of an inbred line population of rice (*Oryza sativa* L) at different growth stages TARE (2011) 14(2): 12-22

Page 29

Figure 5 - caption should read as;

Gained shoot length of two parental rice cultivars after different days of cold stress at 4 °C and recovered at 35 °C in dark for 4 days at post germination stage. The values are average of three replicates and each replicate consisted of twenty seeds HOK-Hokiriku-142, HGKN – Hyogokithanishiki (Ranawake *et al.*, 2008).

Figure 6 - caption should read as;

Frequency distribution of inbred line population according to the average gained shoot length after cold stress at 4 °C for 5 days and recovered at 35 °C in the dark for 4 days. Bars indicate standard deviations. HOK-Hokiriku-142, HGKN – Hyogokithanishiki (Ranawake *et al.*, 2008)
